Excelsior ASD-800 ESD Adhesive is an acrylic wet-set conductive adhesive specifically designed for the permanent installation of ESD rubber and vinyl flooring products over porous substrates in indoor applications; it is a low odor, non-flammable, solvent-free product and ready to use product

Reading the Date Code: B210201515293

Ignore the B, focus on the 210201 which is Year (21) Month (02) and Day (01), ignore the balance as it is for batching information for manufacturer

Located on the lower left corner of the label under the UPC code

| Service & Storage Temperature             | 65° - 85° F                                                            |

Shelf Life depends on proper storage within service & storage temperatures in unopened container

See installation document for full installation details regarding approved substrates, job site conditions and acclimation procedures.

Application Method: Trowel Applied

Resilient Flooring Trowel Sizes & Coverage

(Absorptive) Porous Substrates: 1/16" x 1/16" x 1/16" V Notch, 160 sq. ft. per Gallon

Flash Time: 5 - 10 Minutes

Working Time: Covered & Rolled within 60 Minutes

Access Times During & After Installation:

- Heat Welding ≥ 24 Hours
- Light Foot Traffic ≥ 24 Hours
- Heavy Foot Traffic and Rolling Loads ≥ 48 Hours
- Maintenance ≥ 72 Hours

Trowel Notch Dimensions are Depth x Width x Space

Coverage Rates are approximate and subject to level of porosity as well as ambient conditions, angle of the trowel, actual results may vary

Flash time and working time will vary with conditions; higher temps with higher humidity will be shorter than lower temps with lower humidity
**ASD-800 ESD Acrylic**

**ADHESIVE TECHNICAL DATA**

---

**Sustainability Information**

- Made in the U.S.A.
- Meets Buy America Act (49 CFR Part 661)
- Meets Buy American Act (41 USC §§ 8301-8303)
- Contributes to LEED v4/4.1
- ≤ 1.0 grams/liter VOC Content (SCAQMD Rule 1168)
- Meets SCAQMD Rule 1168 Requirements
- FloorScore Certification
- Meets CA 01350 Requirements
- HPD Available
- Red List Chemical Free
- Contains No Recycled Content

**California Prop 65 Labeling**

To the best of our knowledge, this product does not contain any of the listed chemicals, which the state of California has found to cause cancer, birth defects or other reproductive harm

---

**Approved Flooring Products**

- ESD Rubber Tiles
- ESD Vinyl Tiles

**Approved Substrates & Surfaces**

- Concrete above, on, or below grade; properly prepared for moisture sensitive resilient flooring in place a minimum of 45 days
- APA rated plywood underlayment
- Properly prepared Portland cement based patches & underlayments
- Properly prepared Gypsum cement based underlayments
- Radiant heated sub-floors

**Site Requirements**

- During acclimation, the site must be fully enclosed, weather tight, and material must be in the installation area with the HVAC system functional and operating at desired service temperatures for a period of 48 hours prior to installation, during the installation and for the service life of the installation afterwards.

  It is recommended to maintain an ambient relative humidity between 40% and 60% for a period of 48 hours prior to installation, during the installation and for the service life of the installation afterwards.

**Substrate Requirements**

- All substrates must be prepared according to the information contained within the product installation instructions.

  Concrete substrates, whether on-grade and/or below grade must have an intact and effective moisture vapor barrier which meets the current requirements of ASTM E1745.
### Substrate Requirements
Substrates must be clean, smooth, permanently dry, flat, and structurally sound.
Substrates must be free of visible water or moisture, dust, sealers, paint, sweeping compounds, curing compounds, residual adhesives, concrete hardeners or densifiers, solvents, wax, oil, grease, asphalt, visible alkaline salts or excessive efflorescence, mold, mildew and any other extraneous coating, film, material or foreign matter.

### Adhesive Clean-Up
Uncured Adhesive can be removed with solution of 70% isopropyl alcohol and a clean cloth.
Cured adhesive will be difficult to remove from wall and flooring surfaces, ensure removal prior to curing.

### Product & Substrate Restrictions
Not designed for use with products manufactured with polyolefin, polyethylene, or polypropylene.
Not designed for use on substrates that have been exposed to adhesive removers, solvents, or chemical cleaners.

### Disposal
Disposal in accordance with local, state and federal regulations.
Do not allow product to get into drains, watercourses, or landfills.
Hardened product residues are considered construction waste.
Empty packaging is recyclable.

### Product Warranty
1 Year Manufacturers Warranty
See product warranty for full details regarding bond warranty, limitations, and warranty coverage.
