---

The following information is provided as general guidance, always refer to the current installation information on the product website for the resilient flooring being installed for complete information.

### Approved Flooring Products
- Envire Rubber Sheet (Heat Welded Applications Only)
- Envire Rubber Tile
- Raised Disc Rubber Tile (Trowel Application Only)
- LVT/LVP
- Underlayments

### Approved Substrates & Surfaces
- Concrete above, on, or below grade
- APA rated plywood underlayment
- Properly prepared Portland cement based patches & underlayments
- Properly prepared Gypsum cement based underlayments
- Radiant heated sub-floors

### Site Requirements
- During acclimation, the site must be fully enclosed, weather tight, and material must be in the installation area with the HVAC system functional and operating at desired service temperatures for a period of 48 hours prior to installation, during the installation and for the service life of the installation afterwards.
- It is recommended to maintain an ambient relative humidity between 40% and 60% for a period of 48 hours prior to installation, during the installation and for the service life of the installation afterwards.

### Substrate Requirements
- All substrates must be prepared according to the following information or ASTM F710 or ASTM F1482 at a minimum, as well as applicable ACI and RFCI guidelines.
- Concrete substrates, whether on-grade and/or below grade must have an intact and effective moisture vapor barrier which meets the current requirements of ASTM E1745
- Substrates must be clean, smooth, permanently dry, flat, and structurally sound.
- Substrates must be free of visible water or moisture,
### Substrate Requirements...

- dust, sealers, paint, sweeping compounds, curing compounds, residual adhesives and adhesive removers, concrete hardeners or densifiers, solvents, wax, oil, grease, asphalt, visible alkaline salts or excessive efflorescence, mold, mildew and any other extraneous coating, film, material or foreign matter.

### Adhesive Clean-Up

- Uncured Adhesive can be removed with solution of 70% isopropyl alcohol and a clean cloth.
- Cured adhesive will be difficult to remove from wall and flooring surfaces, ensure removal prior to curing.

### Product & Substrate Restrictions

- Not designed for use with products manufactured with polyolefin, polyethylene, or polypropylene.
- Not designed for use on substrates that have been exposed to adhesive removers, solvents, or chemical cleaners.

### Disposal

- Dispose in accordance with local, state and federal regulations.
- Do not allow product to get into drains, watercourses or landfill.
- Hardened product residues are considered construction waste.
- Empty packaging is recyclable.

### Warranty

- 1 Year Manufacturer’s Warranty
- Bond Warranty determined by Warranty of product being installed, see warranty document for details.
