

**Excelsior SP-500 Spray Adhesive** is an acrylic aerosol pressure sensitive adhesive used for the installation of LVT, LVP and approved Rubber flooring products over porous and non-porous substrates in indoor applications; it is a low odor, non-flammable, solvent-free and ready to use product

Product Type	Acrylic Aerosol Pressure Sensitive Adhesive for porous (absorptive) and non-porous (non-absorptive) surfaces
Characteristics	White Aerosol
Packaging	22 oz. Cans, 6 per carton
Moisture Control Properties	Not a moisture inhibitor or mitigation product
ASTM F2170 - RH Limit	95%, in situ
ASTM F1869 - MVER Limit	8 lbs. / 1000 sq. ft. / 24 hours
ASTM F710 - pH Limit	≤ 11
ASTM D6004 - Adhesive Shear Resistance	Excellent
ASTM D6862 - 90° Peel Resistance	Excellent
ASTM D7888 - Plasticizer Resistance	Excellent
ASTM D7149 - Freeze Thaw Stability	Do Not Allow to Freeze
ASTM F1337 - Shelf Life	2 Years from Manufacturing Date
Reading the Date Co	de 020121
	Month (02) Day (01) Year (21)
	Located on the bottom of the can and front of the box

Service & Storage Temperature  $$60^{\circ}\mbox{ - }85^{\circ}\mbox{ F}$ 

Shelf Life depends on proper storage within service & storage temperatures in unopened container

See installation document for full installation details regarding approved substrates, job site conditions and acclimation procedures.

Application Method Spray Applied

Resilient Flooring Coverage Rubber Tile: 100 Square Feet per Can

LVT & LVP Vinyl Tile: 150 Square Feet per Can

Proper Coverage is determined by marking an area of the square footage and emptying the contents of the unit evenly within that area

150 Square Feet

## SP-500 Spray

## SP-500 Spray

## ADHESIVE TECHNICAL DATA

	Stained concrete that is sound, smooth and free of waxes, cleaners and any other bond inhibiting substances
	Radiant heated sub-floors
Site Requirements	During acclimation, the site must be fully enclosed, weather tight, and material must be in the installation area with the HVAC system functional and operating at desired service temperatures for a period of 48 hours prior It is recommended to maintain an ambient relative humidity between 40% and 60% for a period of 48 hours prior to installation, during the installation and for the service life of the installation afterwards.
Substrate Requirements	All substrates must be prepared according to the information contained within the product installation instructions.
	Concrete substrates, whether on-grade and/or below grade must have an intact and effective moisture vapor barrier which meets the current requirements of ASTM E1745.
	Substrates must be clean, smooth, permanently dry, flat, and structurally sound.
	Substrates must be free of visible water or moisture, dust, sealers, paint, sweeping compounds, curing compounds, residual adhesives, concrete hardeners or densifiers, solvents, wax, oil, grease, asphalt, visible alkaline
Adhesive Clean-Up	Uncured Adhesive can be removed with solution of 70% isopropyl alcohol and a clean cloth.
	Cured adhesive will be difficult to remove from wall and flooring surfaces, ensure removal prior to curing.
Product & Substrate Restrictions	Not designed for use with products manufactured with polyolefin, polyethylene, or polypropylene.
	Not designed for use on substrates that have been exposed to adhesive removers, solvents, or chemical cleaners.
Disposal	Disposal in accordance with local, state and federal regulations.
	Do not allow product to get into drains, watercourses, or landfills.
	Hardened product residues are considered construction waste.
	Empty packaging is recyclable.
Product Warranty	1 Year Manufacturers Warranty
See product warranty for full details regarding bond was	rranty, limitations, and warranty coverage.
