The following information is provided as general guidance, always refer to the current installation information on the product website for the resilient flooring being installed for complete information

Approved Flooring Products

Resilient Wall Base

Rubber Tiles & Sheet Resilient Stair Treads

Underlayments

Approved Substrates & Surfaces Concrete above, on, or below grade; properly prepared for moisture

sensitive resilient flooring in place a minimum of 45 days

APA rated plywood underlayment

Properly prepared Portland cement based patches & underlayments

Properly prepared Gypsum cement based underlayments

Properly prepared VCT, VAT, Quartz Tile, Solid Vinyl Tile, Vinyl Sheet

Goods

Properly prepared Ceramic Tiles

Properly prepared Stone & Terrazzo Tiles

Properly prepared Steel & Aluminum

Epoxy Mitigation & Sealers (100% solid and fully cured)

Stained concrete that is sound, smooth and free of waxes, cleaners and any

other bond inhibiting substances

Radiant heated sub-floors

Site Requirements

During acclimation, the site must be fully enclosed, weather tight, and material must be in the installation area with the HVAC system functional and operating at desired service temperatures for a period of 48 hours prior

to installation, during the installation and for the service life of the installation afterwards.

It is recommended to maintain an ambient relative humidity between 40% and 60% for a period of 48 hours prior to installation, during the installation

and for the service life of the installation afterwards.

Product Warranty	1 Year Manufacturers Warranty
	Empty packaging is recyclable.
	Hardened product residues are considered construction waste.
	Do not allow product to get into drains, watercourses, or landfills.
Disposal	Disposal in accordance with local, state and federal regulations.
	Not designed for use on substrates that have been exposed to adhesive removers, solvents, or chemical cleaners.
Product & Substrate Restrictions	Not designed for use with products manufactured with polyolefin, polyethylene, or polypropylene.
	Cured adhesive will be difficult to remove from wall and flooring surfaces, ensure removal prior to curing.
Adhesive Clean-Up	Uncured Adhesive can be removed with solution of 70% isopropyl alcohol and a clean cloth.
	Substrates must be free of visible water or moisture, dust, sealers, paint, sweeping compounds, curing compounds, residual adhesives, concrete hardeners or densifiers, solvents, wax, oil, grease, asphalt, visible alkaline salts or excessive efflorescence, mold, mildew and any other extraneous coating, film, material or foreign matter.
	Substrates must be clean, smooth, permanently dry, flat, and structurally sound.
	Concrete substrates, whether on-grade and/or below grade must have an intact and effective moisture vapor barrier which meets the current requirements of ASTM E1745.
Substrate Requirements	All substrates must be prepared according to the information contained within the product installation instructions.
